### ■ Evolution to a Company Resolving Social Issues

In order to realize VISION 2050, which was announced in 2019, MARUI GROUP has set goals related to sustainability and well-being as “Impact” goals. In June 2023, we declared that we would evolve into a company that resolves social issues to further accelerate our efforts.

Under the theme of “Evolution to a company resolving social issues”, this report summarizes the strengths we have cultivated since our founding in light of changes in our business, and provides examples of various social experiments aimed at evolution and the people and organizations that bring those experiments to life. And, this year’s introduction of officers, which was quite well received in the 2021 report, is focused on the theme of “My Flow Experience,” expressing the unique values and diversity of each officer in a more causal style than what is normally seen.

This report is both a documentation of our management strategy and a tool for communicating with stakeholders. This report has been created and edited with the aim of moving away from a typical integrated report in order to create a sense of empathy and understanding for MARUI GROUP’s aspirations.

By using this report as a tool to engage in dialogue with stakeholders, we hope to deepen understanding of the Group, attract like-minded colleagues and individuals who can empathize with us, and work together to build an inclusive society that offers happiness to all.

Information on MARUI GROUP’s goals and 2050 Vision can be found in the following reports.
